

WELCOME.....

Southern Hose is a regionally based wholesaler of hose and couplings, established in 1986. Our main focus is on supporting our network of distributors. We aim to offer great customer service, supplying quality products at competitive prices, without delay. Our staff are well trained and experienced, with a combined level of hose and fitting expertise of over 200 years.

We are an independent, family owned and operated company, and not aligned or restricted to any one manufacturer. Rather, we are agents for many good manufacturers, including; RX Plastics, Thor, Alfagomma, Icon-Barfell, Plascorp, Itecnic, Gates, Detroit Rubber, Continental, HAAG, Norma, Esdan, Recoila. This allows us to choose those items which best represent quality and value for money.

Our major warehouse is located in Queanbeyan, NSW - home to much of Canberra's transport services. With this infrastructure on our doorstep, we are able to offer same day service within roughly 100km radius - and overnight service within a 500 km radius. To enhance this service, we keep a very extensive stock of hose and fittings. In fact, if an item is shown in our catalogue, it is our goal to ship it to you the same day you order it. We also have a well-established Australian supplier base, which enables us to quickly ship backup stock direct to you if required.

Our range is not limited to those products shown in our catalogue. We often draw on our extensive knowledge of the hose industry to source "special" items that best suit a specific need, or request.

Southern Hose has long been a strong supporter of Australian Made products - in preference to imports. Apart from the obvious employment & economic benefits for Australians, practical experience has shown us that because Australian Made hoses are manufactured to suit our unique environment, they invariably offer better Durability, UV Resistance and Life Expectancy. For your information, we have highlighted Australian Made products with a green Australian made symbol.

This catalogue encompasses hose products used in all industries, with an emphasis on products common in the rural and agricultural markets. It is deliberately concise, having been designed as a selling tool for our Distributors - to effectively use face to face with your customers. We trust you find it most useful and hope you can use it to increase your sales. We look forward to being of service to you in the near future.

Ross Hickenbotham - Director

SOUTHERN HOSE "FLAT RATE" SUBSIDIZED FREIGHT OFFER

We've simplified our Subsidized Freight offer, making it easier than ever to use. We charge a fraction of the actual cost, and "subsidize" the bulk of the freight costs. We offer 4 main freight choices to consider ;

Freight 500	F I S	- for orders / consignments over \$500 + GST - Order value calculated on single shipment to single destination.
Freight 21kg	\$ 39.00	- for orders under \$500 exceeding 20kg
Freight 20kg	\$ 29.00	- for orders under \$500 up to 20kg
Freight Yours	less 5%	- 5% extra discount for customers using own freight account - does not apply to pick up / priority orders.

These above rates apply to consignments that do not exceed the dimensions of a standard pallet - 115cm x 115cm . Freight companies charge us by "pallet space" and for bulky freight that exceeds the size of a pallet, we're charged for the extra pallet spaces they use. So a coil 180cm x 180cm takes up 4 pallet spaces and we're charged accordingly. We ask for the following additional subsidies for oversized freight.....still only a small portion of our actual cost ;

Oversize freight subsidy to be added to above rates :

Freight Oversize	\$ 85.00 ea item	- Oversize pallet or coil up to 150cm x 150cm max
Freight XL Pallet	\$ 190.00 ea item	- X large pallet or coil up to 180cm x 180cm max
Freight XXL Pallet	\$ 290.00 ea item	- Huge pallet or coil up to 210cm x 210cm max

We use local and national reputable carriers to cover most of NSW & VIC. We select the Carrier depending on cost and reliability to destination. This service is classed as General freight and usually not an Overnight express service.

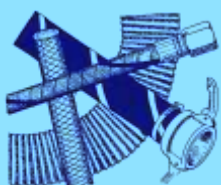

If a customer requests we use a different carrier to who we'd normally use, we're happy to do so provided they pay any extra difference in freight cost. This would be shown as an additional charge on our invoice.

Freight Subsidy charges offered are for **single consignments to single destinations**, not exceeding standard pallet dimensions 115cm x 115cm. (orders for multiple destinations will incur multiple freight subsidy charges)

Backorders are delivered Free – after initial Freight Subsidy Cost has been charged on initial invoice.

5% extra discount from total invoice value for customer who choose to use their own freight account. Doesn't apply to pick up or priority orders (where extra staff / resources are needed in prioritising the order and pushing it to the front of the queue)

PRICES DO NOT INCLUDE 10% GST - ALL PRICES each item

flexible ducting hose

PVC FLEX

PVCFLEX

Clear PVC with white coated steel reinforcing helix. Corrugated style allows for compressing when packing. Reasonable wear resistance for sawdust.

Temp Range : -5°C to +60°C

Flexibility: 8/10

Wear Resistance: 5/10

Clearance - discontinuing

Xtractaflex

XTRACTAFLEX

Grey PVC coated polyester fabric. External square shape steel helix for extra damage protection. Flame retardant material, extreme flexibility. For air and fume removal.

Temp Range : -5°C to +100°C

Static Conducting

Flexibility: 9/10

Wear Resistance: 3/10

Aluminum	bronze	Poly - glass	Ny - glass	stainless
Aluminum is inexpensive and quite durable. Widely used for water in irrigation and petrol & oil in the fuel industry. Investment Sand Cast to NATO Mil Spec. *Max W.P. = 150psi *Temps -20 to 180°C	Bronze is for heavy duty applications. It is widely used in Mining and also in the Chemical industry. Investment Sand Cast to NATO Mil Spec. *Max W.P. = 150psi *Temps -20 to 200°C	An Alloy of Polypropylene and Glass. Resistant to wide range of chemicals. Cheap alternative to using Stainless. Used in general industry and agriculture. *Max W.P. = 100psi *Temps -20 to 100°C	An Alloy of Nylon and Glass. Also resistant to many chemicals. Not suitable for acids. Colour often used to distinguish between multiple lines. *Max W.P. = 100psi *Temps -20 to 100°C	316 Stainless Steel is for heavy duty, corrosive applications. Typically, in higher pressure or temp applications. Investment Cast to NATO Mil Spec. *Max W.P. = 200psi *Temps -20 to 300°C
